## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Paek.

Paek discloses clocking means which are activated during passage of the sportsperson, and which provide signals representative of times of passage along the run abstract; means of modulation/demodulation of signals provided by the clocking means 0014-0015, data acquisition, management and storage means which are connected to the modulation/demodulation means by a network and which comprise at least means for storing the running times of the sportsperson 0014-0015; and terminal means connected as an Internet type network to the data acquisition, management and storage means-(-4), and which are intended to allow the sportsperson to ascertain Iris-running times remotely abstract.

As for claims 2-3, 5-7 Paek discloses means for comparing the running times of the sportsperson so as to allow physical advancement of said sportsperson abstract, the data acquisition, management and storage means comprise means for calculating the average running speed 0045 – et seq., means for storing and recognizing a code to be provided by the sportsperson for the remote interrogation of said means abstract, the code is stored for a duration determined by the data acquisition, management and storage means abstract, at least one panel for immediate display of the running times which is situated in proximity to the finish point fig. 3,

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Paek in view of Uzi.

Paek does not disclose means for evaluating the running times of the sportsperson with respect to at least one physical training programme selected by the sportsperson.

Uzi discloses means for evaluating the running times of the sportsperson with respect to at least one physical training programme selected by the sportsperson col. 1, lines 9 – et seq.

It would have been obvious to use Uzi's means for evaluating, with Paek's device, as it is well known as taught by Uzi, to evaluate the performance of a sportsperson, for providing a feedback to the person of improvements to the performance.

***Allowable Subject Matter***

Claims 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
